7. Personnel Roster Assigned							
Name		ICS Position				Affiliation	
Angie Zavala		Field Observer				US EPA	
8. Operational Period Debrief							
General Remarks / Accomplishments:							
<p>Debris observation conducted at three approved temporary debris management locations in the Bravo Branch. No debris pile found in two of these sites, which means that the site has an approval of temporary debris management but it has not received debris yet.</p> <p>The third site is very well organized. They are segregating tires, and white goods. Huge site with many trucks transporting debris into the site. The approximately volume is 26,500 cubic yards of mainly C&D. The site was monitored and it has a gate. The site has two areas where they bring debris. One area receives debris from the city and the second area from the county.</p>
